

Fellowes[®]
AIR QUALITY MANAGEMENT

CLEAN AIR
FOR ANY
SPACE

We care deeply about helping you be at your best

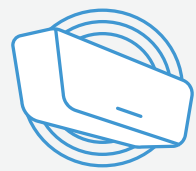

Fellowes is a fourth-generation family business serving at the intersection of family, innovation, quality, and care since 1917. Delivering industry-leading records storage solutions, business machines, workspace management products, mobile technology accessories, and design-focused environmental solutions, we help people be at their best whether at the corporate office to the home office.

Throughout our long history, one of our most defining characteristics is quickly and boldly responding to the needs for our customers.

This spirit of innovation is more alive than ever in our comprehensive line of commercial air purification systems, combining industry-leading purification power and range of intuitive features designed to protect spaces and the people that use them.

For Fellowes, giving our customers the ability to take control of their indoor air quality is just one more way that we're helping people be at their best.

Fellowes: A Global Leader In Localized Indoor Air Quality Solutions

We Know Air Purification

With over 15 years dedicated to breakthrough innovation, scientific testing, and unparalleled customer experience, Fellowes has become the leader in commercial IAQ.

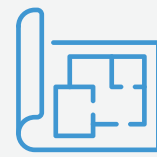

Quality, Performance, and World-Class Customer Service

Fellowes is a private, family-owned manufacturing business. Established in 1917, now in our 4th generation of leadership.

Designed and Engineered in the U.S.

Designed and engineered in our Itasca, IL headquarters, Fellowes proudly provides proprietary IAQ solutions across the globe.

Customized Planning and Pricing

Every project matters. Customized space planning, pricing, and services available through our IAQ experts.

Healthy Air is Essential to All Healthy Spaces

Every organization wants to provide a healthy and comfortable workspace for their teams, customers, and guests. But without an effective air quality strategy, even the most health and wellness focused minded organizations are putting their people at risk. When organizations prioritize HEPA-grade air purification throughout their spaces, the benefits go far beyond better breathing.

-  Improves Productivity
-  Reduces Common Complaints Such as Odors
-  Reduces Absenteeism and Presenteeism
-  Creates a More Positive, Health-Focused Environment
-  Improves Facility Perceptions

State of Indoor Air Quality

Organizations are placing greater focus on indoor air quality as part of broader goals around workplace experience, occupant confidence, and building performance.

What began as a heightened awareness during the pandemic has evolved into a long-term expectation for healthier, higher-performing indoor environments. Employees, building owners, and industry leaders increasingly recognize that indoor air quality impacts health, productivity, and overall workplace satisfaction.

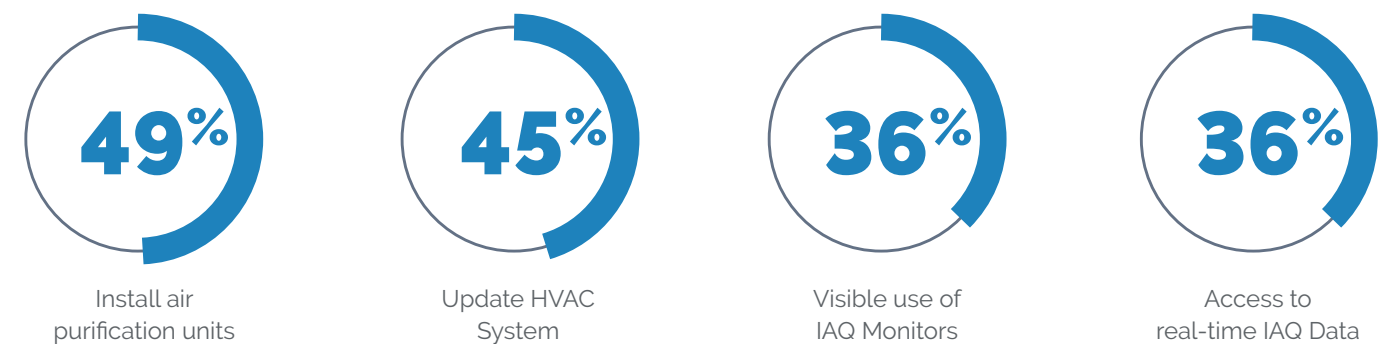

Public health organizations, national associations, and federal initiatives continue to reinforce the importance of improving IAQ in shared spaces. At the same time, rising energy costs are driving organizations to seek strategies that support cleaner air while helping optimize HVAC performance and operational efficiency.

Fellowes research found that while only 52% of workers described their workplace air as "very clean," 93% believe clean indoor air should be a right in every workplace.

Transparency is also becoming a growing expectation. Employees increasingly want visibility into the conditions of the spaces they occupy, including access to real-time indoor air quality information that helps build confidence and trust.

Organizations and stakeholders are seeking practical, scalable solutions that improve IAQ, support energy-saving initiatives, and help optimize building performance without extensive capital investment or disruption to normal operations.

Employee Perceptions of their workplace

The 2025 Fellowes International Day of Clean Air Survey was conducted online by Atomik Research in July 2025 among 1,507 adults throughout the United States and Canada. The sample consisted of 1,006 full-time employees in the United States and 501 full-time employees in Canada, who work at least one full day per week indoors at their employer's location. The margin of error is +/- 3 percentage points, with a confidence level of 95%.

Build the Air Purification System that Meets the Highest Standards...Yours

Fellowes Air Solutions are designed to make your space safe, large or small, private or shared.

The ONLY BMS Integrated Air Purification & Monitoring System

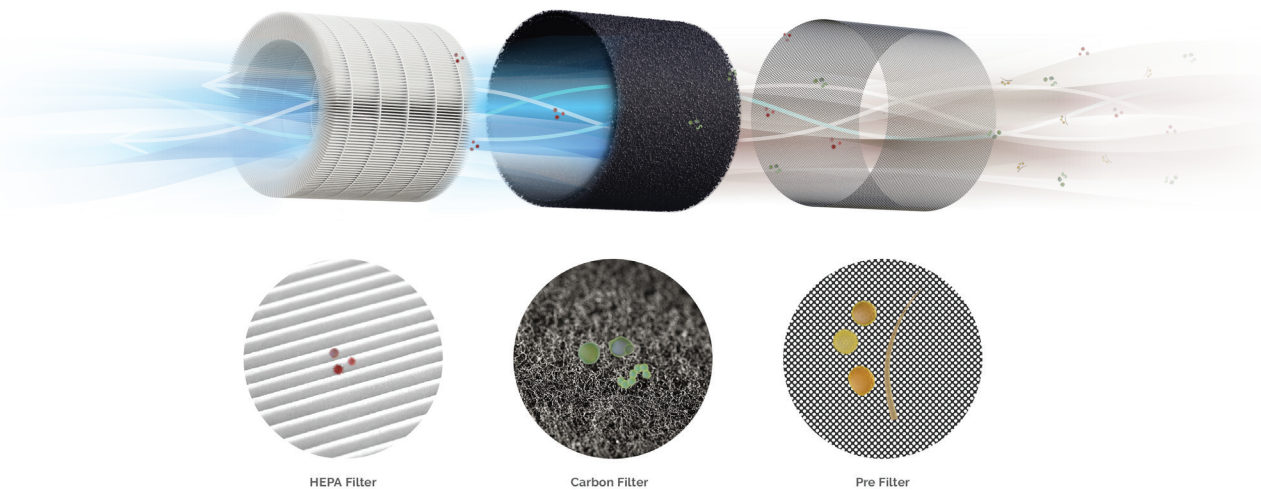

The Smart Way to Improve Indoor Air Quality While Saving Energy Costs, Giving You More Control of Your Space

Fellowes Array is a groundbreaking IAQ system designed to collaborate with HVAC, giving you real-time control over indoor air quality while reducing energy costs. With smart sensors, localized purification, and seamless integration into your Building Management System (BMS), Array ensures healthier, more efficient spaces.

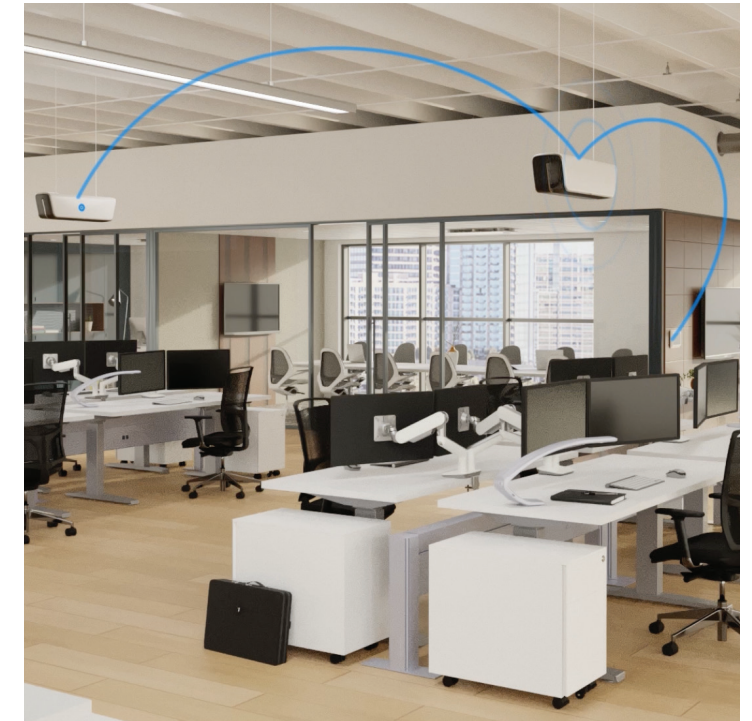

Energy Cost Savings

Array enhances indoor air quality while reducing energy demand. With high-efficiency filtration and reduced reliance on energy-intensive ventilation, it supports HVAC efficiency, lowers costs, and delivers cleaner air without unnecessary strain on your system. With BMS integration, you can unlock even greater efficiencies and cost savings through automated, data-driven ventilation adjustments.

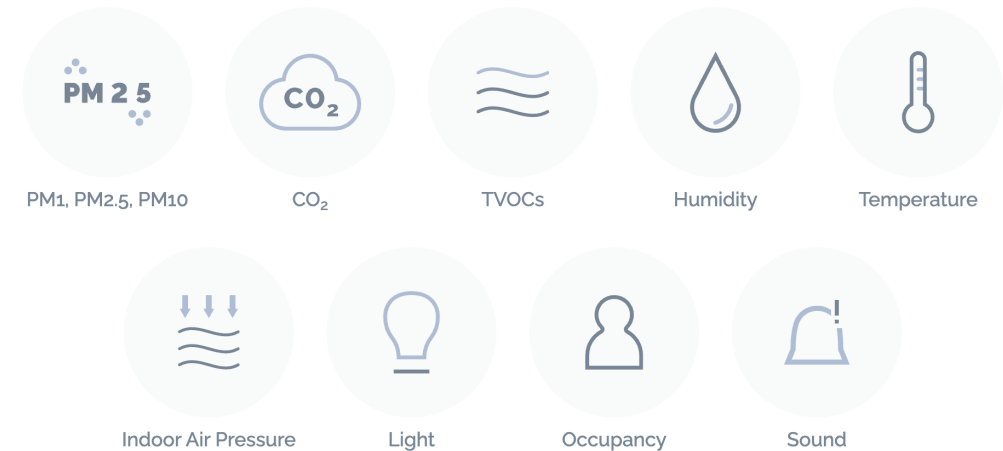

Healthy Buildings

Array combines advanced filtration, intelligent automation, and real-time monitoring to create healthier buildings. With H13 True HEPA filtration, adaptive air management, and a centralized dashboard, Array ensures cleaner air and greater control over your indoor environment.

Simple Implementation, Easy Operation

Array simplifies air quality management with a variety of installation options, easy scalability, and hassle-free maintenance. Its duct-free range of solutions fit any space, while real-time monitoring and intelligent automation ensure optimized IAQ with minimal effort.

The Array® Lineup

The complete line of Fellowes Array products work together to provide an intuitive, coordinated response to your air quality circumstances – all designed with a clean, minimalist aesthetic.

Thanks to a range of configurations and installation options, Array is designed to complement and enhance any space.

Array® Ceiling
Clean Air from Above

Array® Lookout
The Invisible, Now Visible

Array® Relay
Transmits data from Fellowes Viewpoint Plus to your BMS/BAS

Array® Recess
High Performance, Low Profile

Array® Recess UVC
Light-Powered Disinfection

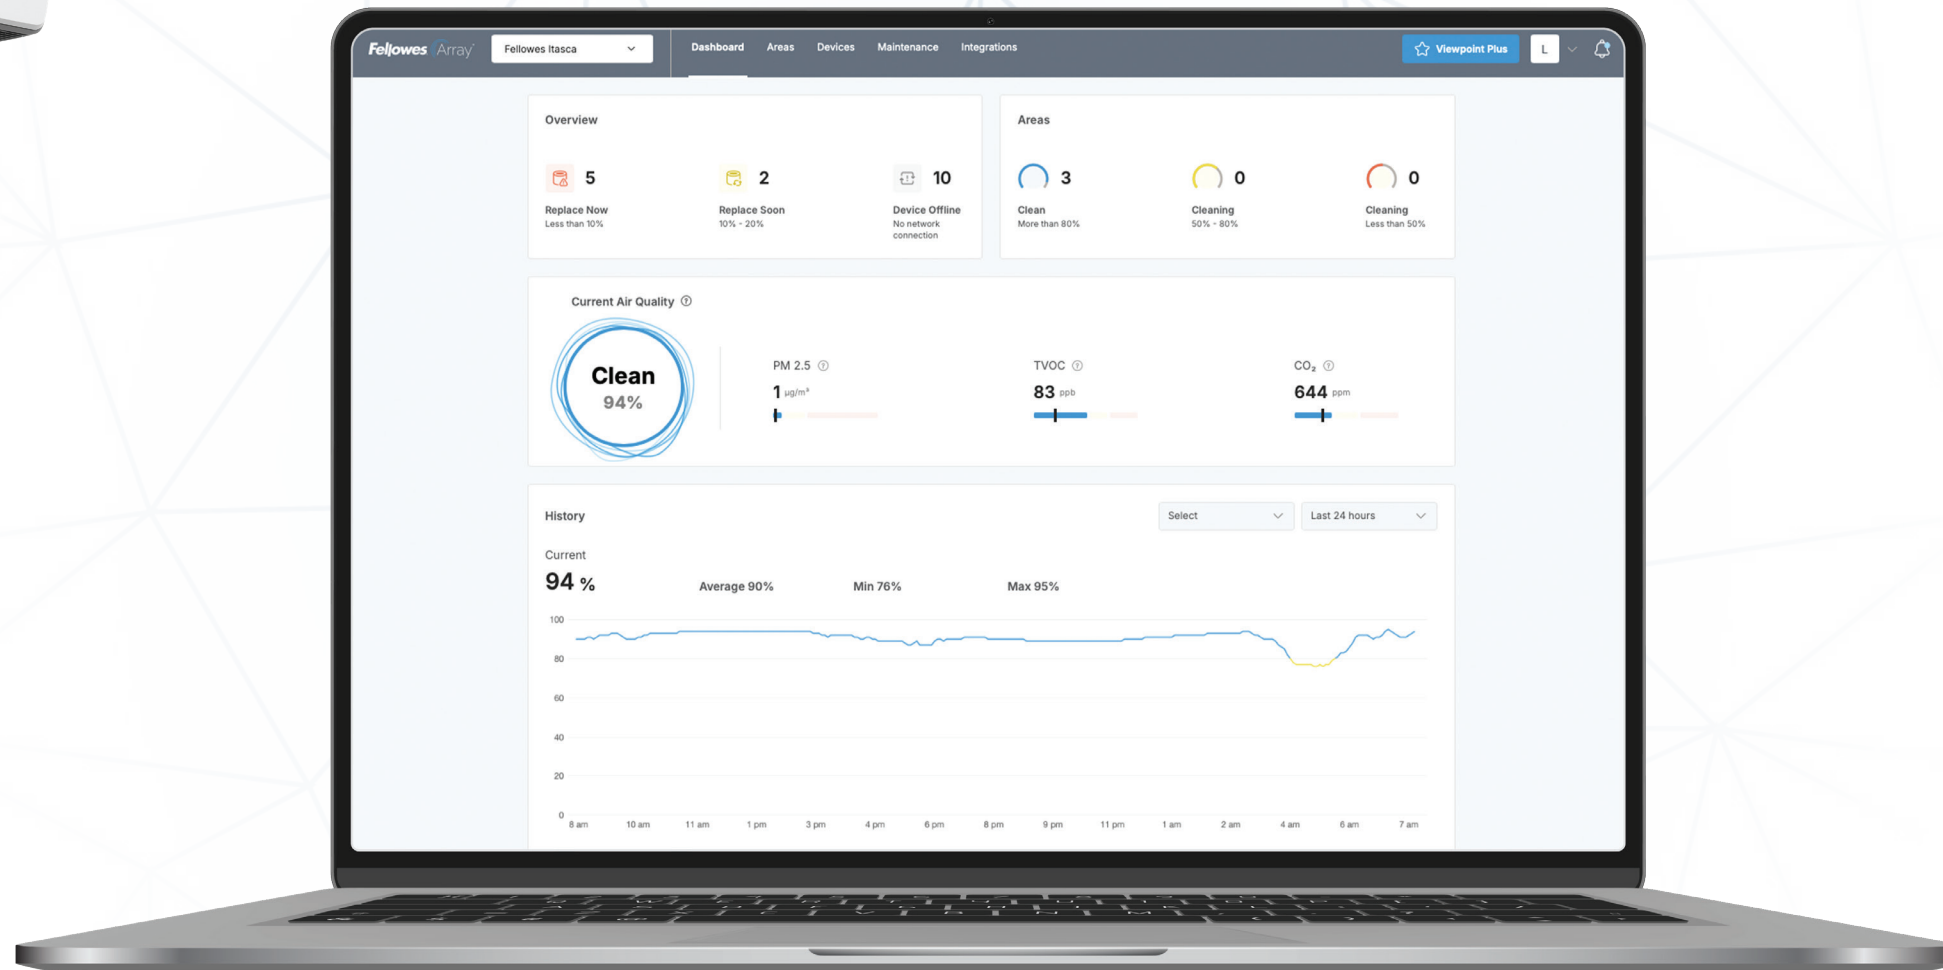

Array® Wall
Wall to Wall Protection

Array® Stand
Designed for Maximum Flexibility

Array® Signal
Monitor Any Space

Array® Viewpoint

The AeraMax® Pro Lineup

AeraMax® Pro features H13 True HEPA filtration and advanced sensors to provide maximum localized protection from airborne contaminants. A great collection of IAQ solutions when networked units is not desired.

4-stage H13 True HEPA filtration with carbon and pre-filter effectively removes at least 99.95% of particles as small as 0.1 microns, including wildfire smoke, allergens, pollen, dust, and pet dander

PureView™ Technology shows the percentage of particles captured and a live status of room air quality, for added peace of mind for building inhabitants

Commercial-grade units for spaces up to 7,785 SQ FT

EnviroSmart™ Technology uses patented, self-regulating sensors to continuously monitor air quality, room occupancy, and noise levels to provide maximum protection, on demand

AeraMax® Pro AM4 PC

The right size for large spaces

The AeraMax® Pro AM4 PC are large commercial-grade air purification units designed to support expansive indoor environments. AeraMax Pro AM4 PC units can cover spaces as large as 3,893 square feet, making them an ideal solution for open office layouts, large conference rooms, and other shared commercial air spaces.

AeraMax® Pro AM4 Flex

Designed for extra-large spaces

The AeraMax® Pro AM4 Flex is a mobile air purifier ready to be moved wherever you need it. As a stand-mounted air purifier with casters, the AM4 Flex combines ease of mobility and powerful purification for unmatched performance in large spaces up to 7,785 square feet. Perfect for cafeterias, gyms, corporate offices, extra-large conference rooms, manufacturing floors and more.

AeraMax® Pro AM3 PC

The perfect fit for most rooms

The AeraMax® Pro AM3 PC is designed for reliable, continuous air cleaning across a range of commercial and shared environments. Available in a variety of AM3 PC units, the system can cover spaces as large as 1,454 square feet, making it well suited for offices, conference rooms, classrooms, restrooms, waiting rooms, and other enclosed or shared spaces.

AeraMax® Pro AM2

Small, but big

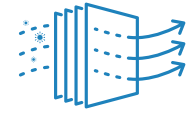

Small, but powerful With its super-slim profile, the AeraMax® Pro AM2 fits seamlessly into smaller spaces while delivering one complete air change every 20 minutes in areas up to 206 square feet. Perfect for exam rooms, tight corridors, and small public restrooms.

For larger spaces, a combination of units can be used to achieve desired air changes per hour.

For more information, visit [Fellows.com/aeramaxpro](https://www.fellows.com/aeramaxpro)

The AeraMax® Small Office Lineup

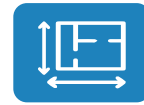

AeraMax® Small Office air purifiers offer standalone, effective IAQ protection within smaller office environments.

3-stage filtration featuring a prefilter, carbon filter, and H13 True HEPA filter that captures up to 99.97% of particles as small as 0.3 microns, including wildfire smoke, allergens, pollen, dust, and pet dander.

AeraSmart™ Technology monitors the air quality and automatically adjusts the fan speed to keep air purified.

Standalone units for spaces up to 3,884 SQ FT

AeraMax® SV

A simple, but powerful solution:

A simple yet powerful solution, the AeraMax® SV delivers reliable, continuous air cleaning for large commercial environments. Capable of covering spaces up to 3884 square feet, it's an ideal choice for open office layouts, large conference rooms, and other expansive shared air spaces.

AeraMax® SE

Dependable for medium sized rooms:

Dependable for medium-sized rooms, the AeraMax® SE delivers reliable, continuous air cleaning across a wide range of shared environments. Capable of covering spaces up to 2,422 square feet, it's ideal for offices, conference rooms, classrooms, restrooms, waiting rooms, and other enclosed shared spaces.
